Yuqi Sui

Web / Frontend Developer

OBJECTIVE

Frontend Developer with hands-on experience building scalable web platforms and custom CMS templates. Experienced in JavaScript, Angular, Vue, React, HTML, CSS, PHP, and Drupal. Passionate about improving user experience, building internal tools to support content teams, and collaborating cross-functionally across product and engineering. Portfolio: <https://sy7777.github.io/yuqi-portfolio/>

EXPERIENCE

2023 – Present

TPG Telecom

Web Developer

- Developed reusable Drupal CMS templates that improved content production efficiency by 30% across TPG, iiNet, and Internode brands
- Worked closely with product managers, designers, and stakeholders to deliver efficient frontend tooling for content and localization teams.
- Evaluated and implemented multiple JavaScript-based solutions for feature delivery, using A/B testing to determine optimal performance and UX.
- Contributed to accessibility compliance and frontend performance optimization across brand websites.
- Provided production support for high-traffic websites, resolving 50+ cross-browser compatibility issues.

2022 – 2023

Axis Tech

Front end developer

- Built a low-code form builder platform using Vue.js and GraphQL that reduced development time for internal tools by 60% . Designed intuitive UX interfaces based on stakeholder feedback.
- Designed and implemented GraphQL APIs to power efficient data queries and mutations.
- Deployed production-ready systems using Cloudflare and CI/CD pipelines.
- Performed database modeling and management using TypeORM, ensuring efficient queries and a well-structured data model.
- Collaborated with internal and external stakeholders to continuously improve UX based on feedback and data insights.

2021 – 2022

Parallel Data Research(Part time)

Software Developer

- Built and maintained the McDonald's Ad Tracker web portal with JavaScript, HTML, and CSS.
- Designed custom survey systems using Decipher and Python for market research clients.
